

Pen-type DO Tester WQ-DO601

Technical indicators

Measuring range:	0~20mg/L Temperature: 0~60°C
Resolution:	0.1mg/L, 0.1°C
Accuracy:	±2%, ±0.3°C
Temperature compensation:	0~60°C, NTC 10K
Working temperature:	0~60°C
Power supply:	lithium battery 3.7V
Standby time:	more than 1 year
Weight:	128g

Main features

- LED segment code LCD display (DO value and temperature value)
- Using 32-bit high-performance processor, high stability and low power consumption
- Easy to replace the electrode
- Automatic shutdown after five minutes without key operation
- Low battery reminder function
- Long standby technology, theoretical standby time is more than one year
- Protection level: IP65

Panel description

Overall structure

- ① Battery compartment cap
- ② LCD display
- ③ Function keys
- ④ Electrode collar
- ⑤ Electrode cap

Display area composition

- ① Status bar
- ② Measurement display
- ③ Unit of measure
- ④ Calibration indicator
- ⑤ Temperature display
